

Why is the *Pikermian fauna* of the Middle Miocene considered as *balanced*?

What does *unbalanced fauna* mean (in the *Pleistocene*)?

What happens due to *the movements of the tectonic plates*?

Do you remember any names of major geological periods?

Name a giant animal with 8 letters!

Until when have Crete and Peloponnese been connected?

*Deinotherium* and *Dinosaur*: which is the *reptile* and which is the *mammal*?

In which Miocene (Upper, Middle or Lower) Greece was almost one land?

Think quickly and tell us 2 animals that they no longer exist at the Aegean Archipelagos.

Does the Earth get old?

How do we know about the organisms that lived in the past?

If the Earth changes, will the *climate* change as well?

During the *Mediterranean salinity crisis* you came next to a volcano. Wait for one round, not to get burned!

*Unbalanced fauna*: Ups! we have lost the carnivores! We have to wait for one round!

We have  reached the present time! What do you think the picture shows, an *Elephant* or a *Cyclops*?

Can anyone predict how the Aegean will change in the following million years? If yes, how?

Are *climate* and *weather* the same?

Can you imagine what scientists call *Aegeis*?

In which period the famous *Ice Age* is placed?

Show us with pantomime a *Deinotherium*.

Show us with pantomime, how the *Sirenians* used to swim.

If you had tusks, what animal could you be? Show us in a sketch.

Now that the sea level goes up and down (in the *Pleistocene*), you have been isolated and became a dwarf *Hippopotamus*! Draw one!

Draw or show with another way the *movement of the tectonic plates* between Crete and Africa.

The ancient Greeks have found me and, since they didn't know what I am, they have called me *Cyclops*. What do you think I am in reality?

Draw quickly a *dwarf* and a *giant* animal of the *Pleistocene*.

Where have we learnt about the *bipedal walking* at Kissamos, Crete, Greece? Show us with a sketch.

Draw a fossil fish of the *Pliocene*!

A fossil plant. Draw a sketch

Show us with pantomime the transition from the 'four-limbs' to the *bipedal walking*.

Show us with pantomime how the *climate* is changing

Draw how the land of the today Greece was during the Lower *Miocene*

Describe the word TUSK without saying the words TOOTH, *DEINOTHERIUM*, *ELEPHANT* and *MAMMOTH*

Describe the word *CARNIVOROUS* without saying the words ANIMAL, MEAT, EAT and FOOD

Describe the word VOLCANO without saying the words LAVA, ERUPTION, BURN and FIRE

Describe the work LAKE without saying the words WATER, LAND, SWEET and SWIMMING POOL

Describe the word ISLAND without saying the words LAND, SEA, HOLIDAYS and ISOLATION
